

Recycled Purchasing Policy

1. All SSRC staff shall make a reasonable effort to find and purchase products with recycled content whenever feasible. If a product is competitively priced and of comparable quality to virgin material products, then staff should endeavor to purchase the recycled-content product.
2. As part of Massachusetts' and this office's goal of "closing the loop" through the purchase of quality recycled-content products, all procurement should be carefully thought out beforehand for need and essential quality specifications.

Adopted 12/15/16
